West Coast Shipping. the three of us company own. 22 22 How many years ago was this Q. What's your position in the 23 Q. 23 business started? corporation known as West Coast Shipping? 24 24 25 We started in 2008. 25 We're a family run business. Page 6 Page 8 incorporated for a while just the two of us Official, my title is President and Chief 2

working there as we build up our California operation we started. 3 4 Let me put a few words what we

do. We offer transportation, Fed Ex 5

services for people who need to move their 6 7

cars and motorcycles across the world. They

move it for different reasons so they move 8

it somewhere, others go on year-long 9

vacation or travel around the world. We 10

have a number of dealers who buy and sell 11 cars all over the world, move them around

12 13 where we sell these cars. The majority of

the cars are classic cars. Our customers 14

15 are collectors.

We have the finest cars in 16

Europe, and bring them to the United States 17 or bring cars from the United States to 18

Europe. We build up business nationwide. 19 20 We were trucking cars to our

first warehouse in California, where we 21

would stage it, submit documents to the U. 22

S. Customs office, load them inside ocean

containers and take them to the ports. 24 25

As the business grew, we

Financal Officer. I also run the marketing, 2

sales. My brother runs the operations. 3

4 Q. When did you acquire 1200 West 5

Blancke Street?

A. We closed on February 14, 2018. 6 7 Q. Are you familiar with the

day-to-day operation of the location on West 8

Blancke Street? 9

A. Very much so, it's not a day

goes by without me speaking to somebody in 11 the office, hiring, resolving some issues. 12

Q. Do you visit the site?

A. Yes, I was just there actually 14

in July, and in March right before the

pandemic started. The pandemic made it 16

difficult to be there regularly. I pretty 17

much like to be present. 18

Q. Can you describe the operation 19

of the business at 1200 West Blancke Street? 20 21

A. We have, like I mentioned,

clients all over the world. We work mostly 22

through virtual through Internet, through 23 our website, email we get orders to ship a 24

particular car from somewhere in the United

10

13

September 8, 2020 Page 11 Page 9 States to somewhere outside the United dozen of trucking companies in the area, 2 States. 2 dispatch and pick up the cars. They go in, If the Port of New Jersey is and depending on their schedule where they 3 3 closer than the Port of Oakland where we 4 coming from, how many cars they are have our first location, we hire trucking delivering, could be as small as a single 5 5 company to go pick up, you get car delivery car trailer, flatbed or tow truck, to larger 6 6 7 to a warehouse, submit documents to the U.S. 7 ones that fit three to five cars to largest 8 Customs office, we consolidate three to five 8 car carriers that fit up to nine cars. of the cars at the site to an ocean MR. back from U. S. Customs office clearing for export, we load the cars inside the container and trucking company takes the 3 4 container and delivers it to the Port of Elizabeth. The port is our livelihood. 5 What's the hours of the 6 operation at the 1200 West Blancke Street 7 8 location? 9 A. HOurs are standard 8 to 5

Monday to Friay. Q. How many employees on the site at peak times and at normal times?

A. Just we just added 11 employees. We mentioned 10. We were lucky enough to see the business return back to pre-COVID level. We need 11 hired. All the

16 people work eight to 5, the same hours. We 17

have five people working in the office, and 18

five people working in the warehouse. 19

20 Q. You said that there are 21 vehicles that arrive on the premises. How do they arrive and what times and what kinds 22 of vehicles are delivered and how? Please describe that process. 24 25

A. We work with probably a couple

dropoff for trailers. You say you start

working at eight o'clock in the morning. 2

Are any of these trailers bringing cars to 3

4 your place, park along Blancke Street?

I know there's a lot of cars. truck-trailers with cars parked on these streets before you get into the site. How

do you remedy that problem? 8 9 A. The truck operators, they're

not our employees. However, because we do a 10 business with them, we are strict about our 11

policy of not allowing anyone either to 12

13 unload cars on West Blancke or wait for us to reopen.

14

5

That's where they also exit. machine made for cars, trucks they use to 8 We separate the ingress and lift the front wheels of the car. They egress traffic to avoid having trucks cross 9 drive the car through a slotted gate which each other and to proceed. 10 10 is located on the left side of the front of MR. RICCI: Under the City's 11 11 the property. This gate is closed outside code, because many of those parking spots 12 12 of eight through 5 Monay through Friday. We aren't directly at the drive aisle, we don't 13 have added slots and add privacy so the car really classify those as parking. You have 14 14 15 is not visible from the outside. your parking variance, whether your engineer 15 As soon as the truck is classified those correctly. Those areas are 16 16 unloaded, the truck exits on the second really outdoor storage areas per se. 17 17 curbcut in, right where you see. When they They're not parking. You are asking for 18 18 exit, they make a right on West Blancke, cars to be parked as outdoor storage. I 19 19 avoiding to have to turn left and blocking want to be clear on that. 20 20 21 the street. They proceed down Blancke, West MR. FIORLETTI: Cars in the 21 Blancke. building too? 22 22 MR. RINALDO: Is there a No A. Yes. 23 23 Left Turn sign there? MR. FIORLETTI: Those are your 24 24 25 A. No, there's No Left Turn, with 25 better cars? Page 18 Page 20 large cars and trucks, we ask the truck A. Not necessarily. It all depends on which destination they are going. drivers to go right so they don't create 2 congestion. We have pretty good security with cameras, 3 3 4 MR. RINALDO: You instruct them 4 alarm company all throughout the property. to go right, right? One more thing, we are asking 5 5 as part of the hearing is to give us A. Yes. This is for delivering 6 6 7 cars to our facility. Then the cars get 7 permission to install a gate at the bottom brought inside the property. We are asking left side of the property, a fenced gate 8 8 to let us store inside the warehouse on one right here. So that even though there's a 9 of the slots that you see that Rich Keller's private road that is only shared between the 10 10 team drew. You will also see many of the three neighbors, we would like to add the 11 11 cars parking attended. fence and gate here with the slots to give 12 12 13 I want to address that. 13 us privacy and also give us security for the Attended because we allocate the cars' 14 14 cause. attended parking spots based on which MR. RINALDO: Are they on the 15 15 container they will be consolidated to. We sheet? Are they shown? 16 16 can see four car spots that's going to be a Q. You're referring to the 17 17 container going out with four cars. You'll fencing? 18 18 see some three. MR. RINALDO: And the gate. 19 19 20 When we move the cars, we have Are they shown on the site plan? 20 one employee that goes in, moves the last 21 MR. LEONARD: I'll let the 21 car that was put in, one by one, takes them engineer address that. 22 22 to the loading dock. Once at the loading 23 MR. RINALDO: Okay.

24

dock, the cars are loaded inside the ocean

container which is delivered prior to

24

25

his testimony.

MR. LEONARD: When he starts

Page 23 Page 21 1 Q. Andrew, you're speaking of big problem in any trucking industry. Any fencing. What is your intention with regard time you have trucks backing up, it is a 2 to fencing and being able to see the back recipe to hurt people. 3 3 from the street? Can you describe what you 4 That's the one reason why we intend to do to create privacy and keep the like this property so much, on the front you 5 5 cars? can enter and exit through two different 6 6 7 My neighbors, immediately 7 sites without having trucks across each below, they already have a chain link fence 8 other. 8 running there. We want to continue and Q. You would not want your trucks 9 9 extend it until basically down the line. to come towards the back of the property 10 10 along that fire lane? And the chain link fence that we are having 11 11 plus the gate, we would like to put the same A. The fire lane, we are very 12 12 slots that block the view from the outside. serious about safety. We're doing this for 13 13 thirteen years without major accidents. MR. RICCI: Is there wire on 14 14 the fence or no barbed wire? Blocking fire lane is never a good part of 15 15 MR. RINALDO: How about the the plan. That's why we keep the fire lane 16 16 open throughout the property. That's why we height? 17 17 18 MR. LEONARD: The engineer will 18 don't allow our, the trucks that come in and address that as well. drop the cars off to go out the property 19 19 20 Your intention is to have it along the fire line. 20 private to obscure any vision towards the The fire line you're referring 21 21 back and to keep the site private? to, we reserve it for our the personnel to 22 22 bring the forklift in to bring the car in 23 A. Exactly. 23 Can you describe, when you talk one by one inside the property. 24 24 25 about trucks coming onto the property, how 25 Q. The forklift is designed

Page 22 Page 24

large are the trucks, and how many per daycome onto the site?

A. When we do the traffic study,

- 4 the numbers were no more than ten trucks
- 5 delivering cars to the property for a day.
- 6 We usually space them up, give them
- tre asaary space mem up, give mem
- 7 appointments when they come in so that all
- 8 ten trucks don't show up at the same time.
- 9 Be careful about that.

10

13

14

15

16

17

18

On the way back from our property, the containers, again, right now we are doing about six to eight each day. We're hoping that the business grows to ten containers per day of trucks going in, picking up loaded containers and taking to the port.

Q. How large are the trucks that come onto the premises?

A. The trucks that deliver cars to the property are anywhere from single flatbed tow truck to park trailers, 56 foot long trailer attached to a semi-trailer. On the ingress and egress side we have space

24 for trucks to enter, go through our property

without having to back up. Backing up is a

specifically for lifting cars?

2 A. Yes, have a special hookup to a void damaging the car.

Q. Now, you mentioned that trucks come onto the property. How long do the

trucks remain on the property while they'reunloading?

A. It's a good question. If youthink about normal operation, they deliver

the car. We give them a check for their

11 service. We mail them a check.

Our personnel does the condition report to the truck driver, the truck driver needs to go, so other people can get paid for the job. They don't like to sit still and wait.

Sometimes if we are slow in documentation, they might stay there twenty minutes. Sometimes we get a full car, all nine cars which is rare. That's just how long it takes to unload.

I think the most any car, truck needs to unload is about an hour. I think most of the time they are in and out within twenty minutes.

24

7 One car, three cars, five, six,

seven, eight, nine, nine is the one, they 8 double-stack them, basically three and 9 three. 10

What's the maximum number of Q. cars that you can process between 8 and 5?

A. We get nine, average they get 13 twenty cars a day delivered on a workday. 14 It gets spread out through the nine working 15

hours. Several cars per hour. 16

Q. You said you use a forklift to move the cars. Are these cars operational?

A. For the majority of the part 19 they are operational. We prefer our 20 employees to use the forklift. It avoids 21 damaging the car mechanically and some of 22 the cars are old and fragile. In addition 23

to that, we don't like our employees to 24 25 drive the cars through the warehouse,

cars anywhere outside. We fully understand

Page 27

2 that and support it. We intend to bring in anything inoperable inside the warehouse. 3

4 Q. Will the public ever come to the property to buy vehicles? 5

6 A. We do not sell them. We do not 7 buy them or service them. We do not dismantle them. We simply Fed Ex for these 9 cars.

MR. FIORLETTI: Mr. Naumov, all the trucks, cars that come in on the trailers, they are operable. That's the only way they get them off the trailer. You have a lot of operable cars coming in.

A. So it's the responsibility of the truck driver to take the car off the car trailers, yes. They could start it. As soon as they start it, take them off, we take possession and they use the forklift. MR. FIORLETTI: They have to

run them to get them off the trailer.

A. Sometimes they just roll them down, depending on where they are. You're correct, the truck driver has to start the car and bring it down.

Page 26

Page 28

running the engine. We don't want that to contaminate gases. When they use the

forklift, the forklift is propane operated. 3

4 It doesn't have mechanicals.

The cars that are delivered and 5 stored, what percentage of them are not 6 7

operable? A. I have to guess, maybe around ten percent of them inoperable. For us, operable and inoperable, we don't drive the

cars. All we do is just, like any cargo, we 11 12

forklift them, bring them to the loading 13 dock, we use the forklift to insert the car

inside the container, close the container. 14

A lot of times we don't know the difference between operable and inoperable. We don't want to take the risk of running the cars.

Q. In the planner's report he was 20 concerned about the operable cars being stored inside, inoperable cars being stored inside. Is that your intention, that you 22 have inoperable cars -- go ahead.

A. We understand the City's reluctance to have, not to have salvaged 1 Q. How long do the vehicles remain on the premises on an average basis? 2

3 A. It's a function of how fast the 4 U. S. Customs Office Port of Elizabeth can

approve the export. 5 A lot times we bring the 6

7 documents. They take two to three days to approve them, stamp them. We spend a week 8 9 looking for consolidation for other cars

going in and ordering a container. I would 10 say for 90 percent of the cars they are in 11 and out of our property within two weeks. 12

Sometimes if there's a problem with the U. S. documentation, the title needs to be restored, there's a lien on the car, that might slow things down. But those are exceptions.

We have had some cars stay there for over a month. But it is a big problem for us. We are not in the business of storing them. We are in the business of getting paid only once we ship them out. If they get stuck, we spend quite a bit of

efforts asking customers to remove them from 24 25 our property or to get us documentation to

Page 31 Page 29 ship them out. building going through some wind. Q. How many spaces will be 2 This was February 28th, I 2 available inside? Did you discuss that? believe ther was a big rainstorm, gust of 3 3 4 We did the math, roughly two 4 winds. Unfortunately, the roof collapsed. hundred cars inside. Insurance company denied covering the claim. 5 5 Q. What's the difference between We had to go and spend money on 6 6 7 the indoor storage areas and the outdoor 7 litigation. Finally, we decided to change 8 storage area? 8 the commitment to cover it. They are A. It's the weather factor. In 9 covering us now. 9 the middle of the winter, snow, some of the Now we have plans ready to 10 10 cars are fragile so having the snow on top submit to the Building Department for 11 11 of them and we put them inside the rebuilding that part of the roof exactly the 12 12 container, which is air and water seal, same way as it was before. 13 13 creates a bad environment for rust to They re-engineered it, added a 14 14 develop. lot more, I guess, strength to them, that 15 15 We would like to keep them part of the roof that collapsed. 16 16 inside. The business, it goes in waves. A We're hoping it's going to be 17 17 completed before the end of October before 18 lot of our customers are more active in fall 18 and spring and less active in summer and the start of the snow. 19 19 MR. RINALDO: Same dimensions? 20 winter. 20 In the winter we like to keep Yes. We thought that's 21 21 as much possible inside the warehouse. partially why we went back and forth on this 22 22 Q. The plans provide for plans, we were thinking about maybe 23 23 forty-eight parking spaces. Will infilling that space. 24 24 25 forty-eight parking spaces be adequate for 25 We have this weird courtyard

Page 32 Page 30

your employees?

A. Lke I mentioned we have 11 2

employees now. I could see us growing to 3

fifteen, 18 employees. The size of the

property limits us to more cars to have more

employees. 6

7

8

13

How many you said is probably

three times more than we'll have it.

Q. At the beginning you mentioned 9 you had a roof collapse. Can you describe 10

the circumstances that caused you to change 11

12 your plans?

A. It was scary. I got a call at

5 in the morning from my crew saying that 14

they are hearing some noise, something is 15

moving. Immediately we brought in an 16

engineer, a contractor crew. We had plans 17

to go in and shore up the next morning at 18

four in the morning, we had a crew ready to 19

20 go out there as emergency. Around midnight

21 it collapsed.

We spent a lot of time with 22

insurance trying to figure out why it

happened. I don't think I fully understand 24

the reason. But maybe a combination of

full of trees and weed grass and snakes. We

wanted to see if we could fill that in as 2

well as using square footage inside the 3

building. But the cost of that was

prohibitive. All we are asking for at this 5

meeting is to let us remove the structure

7 that's there so we don't have to do

maintenance. Two-story, I guess it was done 8

later on. Completely useless as an office

or warehouse.

10

In that area we want to get all 11

12 the greenery out, cut out all the weeds and

13 stuff that's growing and cover it with

gravel and hopefully, end the maintenance

nightmare inside this area. This area is, 15

also, there's a fence on the side so it's 16

not visible. 17

MR. FIORLETTI: Moving right 18

19 along.

MR. RINALDO: Do you have any 20

21 further questions for your witness?

MR. LEONARD: I have no further

23 questions for Mr. Naumov.

Thank you, Board members.

MR. RINALDO: Any questions

22

24

Page 35 Page 33 from our Board? Any questions from the ELIZABETH DOLAN, having been audience? 2 duly sworn by the officer, testified as 2 MR. KLEIN: I have a question. 3 follows: 3 I just want to go back to the number of 4 employees. You mentioned something about DIRECT EXAMINATION BY MR. LEONARD: 5 you have 10, going to be 11, threw out 16 to 6 6 7 18. Is there a limit to the number of 7 Q. Please state your name and your employees that you'll have at the site? 8 address. A. There's a limit to the size of A. Elizabeth Dolan, D-o-l-a-n, 9 9 the property, how many cars we can receive Dolan and Dean Consulting, 181 West High 10 10 for load. That really is a limiting factor. Street in Somerville, New Jersey. 11 11 We would like to hire more people. With the Q. Ms. Dolan, what's your 12 12 modern warehouse and distribution, the tools profession? 13 13 and technology improve so much that you A. I'm a licensed professional 14 14 can't possibly have forty some people engineer specializing in traffic 15 15 working, unless we have a different business engineering. I have been involved in 16 16 traffic engineering for over thirty years. 17 model. 17 After graduation from Rutgers, I've been a 18 MR. KLEIN: Do you think it's 18 necessary to put some kind of limit on the Civil Engineer since 1986. 19 19 number of employees because of the way the MR. RINALDO: We accept. 20 20 parking is laid out, Tony? MR. LEONARD: You accept her? 21 21 MR. RINALDO: We need to know MR. RINALDO: Yes. 22 22 how it's laid out. MR. LEONARD: Thank you. 23 23 MR. PANTINA: I'm the City Q. Ms. Dolan, you prepared a 24 24 25 Engineer. I was going to hold my question traffic study dated May 27, and you also had Page 34 Page 36 for Mr. Keller. Anybody can answer it. a chance to review the City's Traffic and Consulting Engineer Lee Klein's report? On the plans on the zoning 2 2 table there's 65 cars required, you have 50 A. Yes, his report is dated June 3 3 4 existing. You have forty-eight proposed. 4 10th, 2020. None of the numbers add up on the plans. 5 Q. Can you please describe the 5 Can somebody show me where the magical premises and the operations that you 6 7 number of forty-eight exists at? Point to 7 observed and what your conclusions were? A. Sure. We were contacted in it on the screen. 8 8 9 MR. LEONARD: We'll leave it to 9 April of 2020 to prepare a traffic study for Mr. Keller to answer as he's testifying as the application and of course, at that time, 10 10 we were under a lot of shutdown lockdown testifying engineer. 11 11 Q. Mr. Naumov, do you anticipate associated with COVID 2020. 12 12 13 more than fifteen employees on the premises? I had the opportunity to review 13 A. Let's call it maybe twenty if security video footage which was fantastic, 14 14 we are really good at what we're doing and and a fun way to count traffic. 15 15 the economy. I scanned a lot of the videos 16 16 and went back to February 2020. I found a 17 MR. RINALDO: Maximum twenty, 17 day that was great weather, school in 18 okay. 18 session, and I watched the site operations 19 19 20 and counted the activity at the site 20 21 21 driveways. You heard a lot of the 22 22 23 23 operations testimony about how the trucks

24

25

24

25

come in and drop off the vehicles, the

employees come in and they are there by

Page 39 Page 37 And then those vehicles are transported by eight o'clock, leave at 5 o'clock, 2 All of that showed up on the 2 forklift into the back of the site. security footage that I watched. I was able 3 It seems to be, from my 3 4 to count the driveway activity and record observations, a very smooth operation from a the peak hour activity from 8 to 9 A.M. and traffic perspective, not a high volume or 5 5 from four to five P.M. 6 high intensity operation, and if activity 6 7 The site's not very busy in 7 were to double, certainly, the driveway and terms of traffic. We had sixteen vehicles the roadway system can handle that additioal 8 come in, and nine exit during the morning increase and operate at acceptable levels of 9 9 peak hour and 5 enter and nine exit during service. 10 10 the evening peak hour. Those are low Q. From a traffic standpoint, is 11 11 volumes from a traffic perspective. The 12 this site detrimental to the neighborhood? 12 good stuff that I saw on the video was truck A. Certainly not. In fact, one of 13 manuevering into and out of the site. the things I noticed on the video was truck 14 14 15 There was little delay manuevering at one of the properties across 15 associated with these truck maneuvers, a the street that caused some backup on 16 16 little delay associated with passenger 17 Blancke. 17 18 vehicles entering and exiting the site. It's 18 That is not anything that I operating very efficiently from the noticed in the video that I reviewed for the 19 19 different videos that I observed, and the 20 20 site in question. activity, as I said, is low in terms of As Andrew testified, the trucks 21 21 traffic engineering standards. come into the property, they turn off 22 22 Andrew talked about the Blancke, come in and stage and they 23 23 pre-COVID activity and the anticipated immediately exit so there's no backup. 24 24 activity and the anticipated employee load. 25 There's no manuevering of trucks that would Page 38 Page 40 Over the course of the day, approximately cause hesitation out to Blancke Street. ten trucks may come in to drop off vehicles Q. On a daily basis entering and 2 at the site, another ten trucks may leave exiting, can you give us those numbers? 3 3 4 the site to transport vehicles off the site. 4 A. Based on the pre-COVID We analyzed future volumes by activity, it was a maximum of ten trucks 5 5 simply doubling the volumes that we entering to drop off vehicles over the 6 7 recorded. We found that the levels of 7 course of a day, again from 8:00 A.M. to 5 service which is the traffic engineerings P.M. Then a maximum of ten trucks taking 8 8 9 mean of analyzing driveways and 9 vehicles of the property throughout the intersections are in the Level of Service B course of the day. That's spread out 10 10 range, that's consistent with the throughout the business day from 8 A.M. to 5 11 11 observations that I made. 12 12 13 I think it's a very efficient 13 Q. Mr. Klein's report, do you have operation that's existing and is expected to any comment? 14 14 continue, and if there's a slight uptick in A. Mr. Klein's report is broken up 15 15 activity at the site, it can be accommodated into two sections. The first is regarding 16 16 based on the traffic counts that we the Traffic Impact Study. That was the 17 17 conducted along Blancke Street, again testimony I just gave. 18 18 He generally found our analysis pre-COVID and the driveway volumes we 19 19 20 analyzed. to be acceptable. 20

The activity associated with

then offloading the vehicles certainly makes

- line, you can see there are existing 19
- 20 landscaping that sits between the curbline
- 21 and the parking lot that provides for
- effective screening of the area where we 22
- plan on doing the offloading of the truck. 23
- We have a unique opportunity 24
  - here. He moved in, got a C.O., and we have

Page 51 Page 49 a good opportunity to see how, what the matter since we are configuring the parking 2 impact is on the neighborhood. He's been 2 spaces and putting in the exterior parking operational for almost two and a half years. spaces, that it was a matter for the 3 3 4 Our traffic expert Betsy Dolan Planning Board to hear, within it as could review security footage to see exactly required by the Municipal Land Use Statute. 5 5 MR. RICCI: Just to be clear, the smoothness of the operation and the way 6 6 7 that the employees arrive and park against 7 this is not where it's clearly identified as 8 the building, and where the offloading 8 a permitted use. The zoning officer occurs in the screened area in the parking interpreted this, my understanding that he 9 lot in the open area. sent it to the Planning Board but, just be 10 10 It's rare you actually get to clear, this is like it was a close call 11 11 see the potential negative impacts of the where it was sent. 12 12 13 project because it's been in operation two It was first rejected, went to 13 the Zoning Board. It ended up here. years. 14 14 Photograph 2 from Google Street There's nowhere in the code it is specified 15 15 View from 2019 generous entrance into the identified. Be careful how you use the 16 16 site, landscaping. vernacular that this is specifically 17 17 18 The existing brick building, 18 permitted or not. That's not the case. that will be renovated and restored. The I was told, right or wrong, 19 19 rest of the building will be more modern, what Mr. Rinaldo is looking for, that you 20 20 has better longevity. were granted a C.O. in 2018, is that true or 21 21 The third view is the property not? 22 22 looking at the egress driveway, looking 23 Q. Mr. Naumov, were you granted a 23 down, you can see the privacy slats are C.O. for this site? 24 24 25 installed in the fencing. These will not 25 MR. NAUMOV: I would like to Page 50 Page 52 remain in this location, will go in the back address the Board member. We applied for of the building. the C.O. in 2017 before we acquired the 2 2 Those are the street views property. It was granted, I believe, in the 3 3 4 which I'll refer to when I do the planning 4 fall of 2017. testimony. MR. RINALDO: For better or for 5 5 If I go to the sie plan that worse, right? Go ahead. 6 6 7 was submitted, --7 MR. RICCI: It's my understanding, just so you know, for the MR. RINALDO: Before you do 8 8 record, the zoning officer granted a C.O. At 9 that, Mr. Keller, how did we get to the 9 Planning Board originally? Because I know that point after the C.O. was granted, I 10 10 11

that going back, I spoke to Mr. Leonard 11 quite sometime ago. I'm not sure if you 12 13 were granted a C.O. or whether or not our zoning officer said you better file with the 14 15 Planning Board.

Can you clarify that, for the 16 17 record?

MR. LEONARD: Yes. I had 18 researched and discussed the matter with Mr. 19 20 Rinaldo and with Brian Fritzsche of the 21 Zoning Board. And because this site was a permitted use within the L-1 zone, the 22 Secretary of the Zoning Board refused to consider it as an application. 24

25 Therefore, we felt it was a

think it was his position it was unclear in the zoning officer's mind whether your use 12 13 was permitted or not. I think you may be the last one where that determination had been made. 15 Zoning is not clear about this 16

recommends zoning clarify the issue, specifically states it's prohibited, just so you are aware. MR. LEONARD: Mr. Ricci and Mr. Rinaldo, has the zoning ordinance changed? MR. RICCI: It has not. It's still in that gray area. The zoning officer, when I spoke to him on the phone,

use. You have a Mater Plan tha specifically

17

18

19

20

22

23

24

Page 55 Page 53 told me based on those facts that it should into the back. We are removing these go to the Planning Board to consider it a 2 existing 12 parking spaces, adding nine, net permitted use at the time. That's my 3 reduction of three, go from 51 down to 48 in understanding. the proposed condition. MR. RINALDO: That's If you add up the existing 5 5 spaces plus the proposed, netting out we sufficient. Let's move on. 6 6 7 MR. KELLER: I'd like to just 7 have a total of 49 cars shown on the site. 8 clarify, I wasn't touting this was some 46 standard and two handicap closest to the implicit rights that were garnered. 9 entrance to the building. 9 The appliant got a C.O. for MR. RINALDO: Forty-nine? 10 10 A. Forty-eight. Fifty-one down to whatever reason, and we are here today to 11 11 basically get ourselves sanctified with what 12 forty-eight. I apologize. 12 I think is a preliminary and final site We go over the other salient 13 13 plan, based upon the merits and to argue the features of the proposal, which indicated 14 14 15 need for two variances before the Board. there are three sections in the light purple 15 The applicant is seeking to of the building we are removing, one in that 16 16 beautify the site, improve the property, and courtyard. It is really a gap between the 17 17 18 basically get everything clear on the record 18 buildings. It's not a usable area. As was so if there is any gray area in the future, indicated, it is overrun with rodents, 19 19 it's clear what the intention was and what snakes, hard to maintain. We are looking at 20 20 the Board approved here. So I easn't 21 removing that 1685 square foot portion of 21 implying any benefits, we still need site the building and actually putting gravel in 22 22 plan approval for this for two variances. there for easier maintenance, removing a 23 23 MR. RINALDO: There's no small addition in the back to allow for the 24 24 25 situation the applicant is delaying this. 25 addition of two more loading docks, so we

Page 54 Page 56

The delay was because bouncing between the

Planning Board and Zoning Board and the

zoning officer. I think we have covered 3

4 that. Now you can tell us about the plan.

Certainly. To go over the site 5 as indicated, let me just clear up the

7 parking situation, we do show, if you count

the number of spaces in the front, we're not 8

counting the spaces in the back, you get

eight spaces, two handicapped, three, 12, 10 three, 12, three that all adds up to be the

11

existing 51 cars that are on the site. What 12

13 we are doing we are adding 9 spaces up in

this area, against the building, and taking 14

15 away 12 so then a net reduction of three.

Go to the next sheet, we have added 5 spaces along the northeasterly

border, four spaces facing against the 18

building, we added nine, we taken these 12 19

20 and eliminating them to make that a

21 designated area parking spaces to be

removed. We have got the car carrier 22

loading area, excess of 96 feet, get nine

car carrier and maneuvering area to get the 24

vehicles off onto the dedicated forklift and

have a total of six loading docks. When the

cars that are taking the cars to the port 2

3 and they are filling those conainers,

4 they'll come down the ingress easement to

the site, come to the back area, back into 5

one of the loading docks, and then the 6

7 container will be loaded onto the vehicle.

They will leave doubling back the same way 8

and out through that easement that takes 9

them back out to Blancke Street, so no 10

commingling of the vehicles that are 11

12 leaving. They are using the easement in and

13 out.

14

15

16

17

The car carriers are restricted to that counter clockwise, coming in, doing the dropoff, leaving again.

So one of the things that Mr.

Naumov expressed early on, he did not want 18

the tractor-trailers offloading in this 19

20 area, found it unsafe. You have a vehicle

21 that would not be in a movable position for

twenty minutes to an hour compromising the 22

23 fire lane.

What we really wanted to do was 24

keep that benign, and our traffic consultant

16

17

West Coast Shipping September 8, 2020 Page 59 Page 57 Betsy Dolan said that it's actually a very 1 MR. RINALDO: Okay. 2 smooth operation and keeps the vehicles 2 The other thing we were clear completely segregated. 3 on, since in the winter hours it does get 3 4 That way the individual workers 4 dark sometimes before four or five o'clock who are moving for these cars into coming and light after eight o'clock, we came up 5 5 out to do one of the shipping containers, 6 with the state-of-the-art lighting plan, 6 7 they are free to move without having the 7 combination pole mounted fixtures, building truck traffic on the very far left of the 8 mounted fixtures throughout the site that property or out in the public part. This provides for adequate lighting, kept it on 9 9 area is r4ely reserved only for the movement the safe but lower end of the spectrum. 10 10 of outdoor storage of vehicles not trucks. We're very proud of our 11 11 That was designed, purposely to be safer. lighting plan. We have a very low 12 12 Andrew was expressing safety uniformity. The average lighting is the 13 13 was his biggest concern on the operation minimum. 14 14 bifurcating the arrivals and departure of MR. RINALDO: Shown on the 15 15 the vehicles was critical, leaving this area plan, correct? 16 16 Sheet 4 of the plan. free for his workers to pick up cars and get 17 17 them into the building. 18 18 MR. RINALDO: With regard to With the removal of the three the fencing that you propose, is that shown 19 19 portions, we are removing a net of 9050 on any of the plan? 20 20 square feet of the building, 7365 feet of A. Yes. I was going to come back 21 21 that is going to be converted from building to that. That was something my office 22 22 to pavement, taking out building sections apparently goofed on. We did show the front 23 23 converting to pavement and the last section fencing, existing fencing, chain link 24 24 25 we are converting to gravel. 25 privacy fence continues, we show the infill Page 58 Page 60 With the reduced building, as 1 fencing along the courtyard.

we indicated, the applicant seeks to create a tandem parking area, outdoor storage for 3 4 281 vehicles. That's a maximum, allows flexibility of sections to use, three, four, 5 five, six cars, that could be held onto 6 7 vehicles as indciated, generally tend to stack them in the row by container when they 8 9 leave the site. The vehicle storage area is 10

the spacing 7 by 16 is actually industry standard. It is appropriate in this case. With the removal of the rear 1710 square feet allows for additional loading docks. This 20 a foot fire lane not just shown as a graphic on the drawing, it will be painted as such. It will be easy for the Fire Department to be assured that

accessed only by employees. Therefore, in

20 no vehicles are parked in that 20 foot fire 21 lane. It's easily enforceable because it's

painted on the ground. 22

The applicant is going to stripe that area as a fire lane and clearly indicated as a fire lane.

Andrew will provide a privacy 2 six foot fence that provides a visual 3

4 screening and protects along the easement

ingress and he egress. 5

We'll modify the plan on the 6 7 fly to provide a fence that would provide gates for access, and visual screening so 8

even though it's not a street, they'll be 9 limited view into the storage area or the 10

operational area. That fencing is not 11

shown. It's an area I'm pointing out on the 12

13 lower left side of the drawing,

northwesterly portion of the site. 14

MR. RICCI: Mr. Keller, you 15 said you had a conversation with the Fire 16 Department regarding the fire lanes? 17

MR. KELLER: Either Andrew did or the zoning officer did, it was told to us that one of the recommendations was that we needed to make sure we kept a distance from any building mounted sprinkler connections and also we provided a twenty foot stripe

23 fire lane for access throughout the antire 24

site. 25

11

12

21

Page 63 Page 61 I don't know whether that came MR. KLEIN: Make that a 1 1 from Andrew directly or from the zoning 2 condition. 2 officer. Those were, sort of pandemic 3 MR. NAUMOV: I spoke to the 3 times, we relied on the owner interfacing deputy chief about ingress and egress to with the zoning officer. fire. That's part of our plan to stripe it. 5 5 We are willing to meet with the 6 MR. RINALDO: Did you review 6 7 fire code official to make sure they are 7 the Fire Department letter of August 26th? 8 comfortable with it. 8 Do you agree with the suggestions that he We'll certainly throuw some made in that report? 9 9 truck turning templates, so we got the MR. LEONARD: If you would 10 10 letter too late from traffic and engineering kindly tell us what it says. I did not see 11 11 it. I don't know if I didn't pick it up as to respond to that. We'll show the truck 12 12 turning templates to show trucks can get in an email. I did not see that report. I 13 13 and a fire vehicle the town would use can assume that it's not burdensome. 14 14 get into the site and have access to the MR. RINALDO: Need approved for 15 15 site, and circumnavigate the site and get uniformed passageways between vehicle 16 16 out. We are happy to do that. storage to access doors, FDC's and building, 17 17 We hope that could be an number one. 18 18 Marking is number two. 19 approval. 19 MR. KLEIN: Can you also show Required access is number 3. 20 20 the car carrier coming in? Garage and exit doors need to 21 21 A. You got enough room to pull in be accessible at all times. 22 22 and all the way out. The car carrier, The applicant must provide a 23 23 maximum of 55, we show 96 feet, they have a Suprasafe key box, we just spoke about. 24 24 25 hundred feet. They can actually pull in. 25 Install bollards to protect FDC's and yard Page 62 Page 64

- We witness them doing that already. One of
  the benefits of the user being in operation,
  you can see.
  MR. KLEIN: Can you go back to
  the corner again with the fence, what's the
  cross hatch?
  A. It is part of the subject
- 8 property deeded to use easement by somebody
  9 else, chain link fence comes around. It's
  10 part of the property. We don't have use of
  11 that gravel area. We would pick up off that
  12 fence and close off the rear fence.

There's a fence on the restricted portion, the easement portion, another fence on the left side. We would like to connect that with a gate, 10 foot gate across the drive area, continue that

all the way across and merge up, turn the angle and against the corner there, both

security and visually protection for the people to the west.

MR. KLEIN: Will you put a knox box, some kind of access for the Fire Department?

A. Absolutely.

hydrants, plus all the regulations.

2 MR. KELLER: I don't think we

3 have any problems meeting any of those

4 requirements.

MR. PANTINA: Mr. Keller, haveyou received my report, is that correct,Nick Pantina, City Engineer?

8 A. Yes. I haven't done my9 planning testimony. I can look at your10 letter in front of me.

MR. PANTINA: I just have a couple questions, we got testimony from you and Mr. Naumov, thank you very much. There are some things that you want to show on the plan, fencing. You mentioned us of the easements at the southerly end of the site to get out. At one point, I heard that.

MR. KELLER: That is correct.

MR. KELLER: That is correct.
MR. PANTINA: Why isn't that information shown on the plan? If there's an easement there, why isn't the driveway access shown? It's shown on the exhibit.
Why isn't it shown on the site plan?
Driveway there or driveway access or

driveway curbcut down the street?

Page 65 Page 67 MR. KELLER: When we started vehicles would get access to them. 1 this, there were no changes to the site. It 2 MR. PANTINA: Other comments on 2 was thought there would not be any changes my report are basically maintenance, 3 3 4 to the building. It was a striping plan. 4 housekeeping. Show some spots, got to show We started with our land and the sign. I didn't see architectural plans 5 5 title survey, and we showed the curb 6 to support the loading docks you're going to 6 7 information. We did not show, it's really 7 create. You have to provide that. an edge of pavement runs throughout the 8 Do you have any issue to 8 easement. We showed the easement egress and satisfy my report? 9 ingress. It was shown on the site plan and MR. KELLER: We have no 10 10 problems. We didn't do it until traffic 11 survey. 11 We show the fire lane coming survey. We called for everything to be 12 12 out and to the property line, implying drained in the current direction. We felt 13 there's a driveway there. We didn't show Andrew, hoping the Board would approve it, 14 14 it. We didn't have the information as to get the topographic information to show the 15 15 the exact limits. There were two inlets grades of the proposed pavements, etc. No 16 16 shown. It's sort of an area where it turns problems with anything in your letter at 17 17 18 from pavement into edge of pavement and 18 dirt. Kind of all over the place. I do know that an architect had 19 19 We can certainly clarify that done pretty detailed plans before we came 20 20 before the building collapse. He will to show the limits of pavement in this area. 21 21 Then, of course, we would add the fencing certainly come up with an elevation for the 22 22 23 and the cross area. loading dock. 23 MR. PANTINA Since you added I know Andrew, I think we 24 24 25 the stuff to the plan, I think you should 25 submitted this, it may not have made it to Page 66 Page 68 add those features to the plan. Even though the website. There was an exhibit A-3. you killed it with the circulation or the Andrew had a photo rendering of the 2 access and how you can unload the car aesthetics of what Andrew wanted the 3 3 4 carriers, I believe in my report, maybe 4 building to look like. possibly, Mr. Klein's report, you talked The existing brick would be 5 5 detailed clean, fixed up and painted and the about a circulation plan, maybe turning 6 6 building itself would be clad with weather 7 movements. 7 resistant material that would last twenty Maybe you could show us 8 8 9 movements or a quick graphic, a subset 9 years without being painted. We really somewhere on how the car carrier is going to dress it up, make it more attractive, would 10 10 be unloaded with the existing cars parked be a plus to the streetscape. 11 11 there and cars parked around it. 12 12 This is, basically, this was 13 Yes. We have no problem 13 not done by the architect but by Andrew and supplementing the drawing with an additional one of his designers, this sort of 14 maneuvering plan showing both an emergency aesthetic. 15 15 MR. PANTINA: We didn't receive vehicle as well as the car carrier. 16 16 MR. PANTINA: How you get the that. We received September 4th your 17 17 refuse out too. exhibits which were the three existing 18 18 photos and the aerial. A. Refuse with 10, now 11 19 19 20 employees, maybe going up to twenty, we MR. KELLER: There was a typo 20 21 don't generate any waste. Whatever minor 21 in one of the emails from the team to the office paper is generated, maybe lunch Board's secretary. I thought I doubled back 22 22 and later emailed, sent it to email blast. containers, et cetera. We believe that's 23

24

going to be back at the end of the site.

We'll clarify that and we'll show how

24

25

Certainly, I would submit this, call it

exibit A-3, I'm sorry, A-4.

Page 71 Page 69 existing, proposed is forty-eight. We need 1 MR. PANTINA: Seeing you'll comply with my letter, I have no further 2 a variance for eleven cars. We see this as 2 essentially a C2 variance. comments. 3 3 This is a flexibile variance 4 MR. RICCI: I missed the 4 material it was made out of? where the variance represents a better 5 5 Mr. Naumov, you talk about your 6 planning alternative than the conforming 6 7 vision. 7 8 MR. NAUMOV: This is a regular 8 The purposes of the Municipal siding material made out of composite. It Land Use Act are advanced is that basically 9 9 is already painted in the factory and has a the parking that's required by ordinance is 10 10 clear coat, and works for thirty years. not needed for the proposed use. To allow 11 11 The reason we picked that 12 isolated spaces to be used for offloading 12 12 color, our company's brand color has that vehicles, safety for employees, moving the 13 dark blue. We just thought it was an cars from the building for shipment, the use 14 14 economic way of making it look like, the of the front are are provides a safer 15 15 work and the marketing image we have through alternative than providing 12 additional 16 16 our website. spaces that are not needed. 17 17 18 MR. RICCI: That's fine. But 18 As indicated by Betty, while you have to understand at some point these your ordinance requires significant amounts 19 19 buildings are inspected. What we are of parking, I.T.E. Fifth Generation Parking 20 20 inspecting, we need to understand what that Manual for this type of use would only 21 21 is at some point. When you submit A-4, can require us to have twenty-three spaces. We 22 22 yo just put a note what the material is. are providing forty-eight. It's closer to 23 23 MR. NAUMOV: Absolutely. the use that Mr. Naumov is proposing. We 24 24 25 MR. LEONARD: Quickly planning. 25 don't need the spaces, and have a safer

safe operation.

Page 70 Page 72

the positive critera. The other purposes

are advanced, aesthetics, for cleaning up

the site and building, fencing those areas

and putting privacy screening in.

attractive building than exists today.

Obviously, we think we advance

We are clearly creating a more

With regard to the negative

criteria, there's no substatial detriment to

alternative to use that for bifurcated offloading of the vehicles. It allows for a

MR. KELLER: We need two variances, one for lot coverage, fifty 2 percent is permitted, existing site is 93.5. 3 4 MR. RICCI: Coverage in the City of Linden under the definition it is 5 the building coverage. It's not the total 6 7 impervious coverage. I'll do a quick calculation. Your building is what size? 8 9 A. Building in its proposed condition, I'll go to the zoning table, 10 building size is 58,835 square feet. 11 MR. RICCI: You're well under 12 the permitted building coverage. You don't 13 need that. Update your plan. 14 Thank you. I appreciate that. 15 We do not need a coverage variance, just 16 need a parking variance. 17

I'm going to, basically, the

parking variance, fifty-nine are required,

not 65 which was in our original zoning

table. We did not need to break out the

allocated under office comes under the

warehouse heading, so accordingly, we

require 59 spaces, there are fifty-one

office space, less than ten percent is

the public good, and no substantial impairment to the intent of the zone plan of the zoning ordinance and zoning plan. Impervious comes down to traffic consultant who has confirmed that with the ten employees there, there's a safe traffic flow with the offloading, very low to the West Blancke Street traffic. While your Master Plan does
